CHARACTER RECORD SHEETS

BILL SLAVICSEK AND ROBERT CAMPBELL

FILLING OUT CHARACTER RECORD SHEETS

Important! Before you fill out a record sheet of any type, check to see if it's the only one you have left. If so, you have permission to photocopy the sheet (provided it's for your personal use only), as is mentioned on the originals.

1 Start by filling in your character's name, class and species, level, size, age, gender, height, weight, and hair, eye, and skin color. Most of these will be pretty obvious based on the species, but if you need help, you can either use the tables in Chapter 6: Heroic Characteristics or just treat them as guidelines. Also, put your own name on the sheet.

2 Fill in your character's ability scores and their modifiers. The Temporary Score and Temporary Modifiers boxes are there to make it easier for you to track ability score damage or the effects of certain Force skills.

3 Fill in your character's total vitality points and wound points. (Remember that wound points are always equal to your character's Constitution score, and they change when your character's Constitution changes.) Include the size of the vitality die (d6, d8, or d10) for your character's current class. Leave the spaces for Current Vitality and Current Wounds blank—you'll use those later to keep track of damage dealt to your character.

4 Fill in the information for your character's Defense score. Start with the class bonus. If your character wears armor, the equipment bonus from that armor replaces the class bonus—these bonuses do not stack, and an armor bonus supersedes a class bonus. Then include Dexterity, size, and miscellaneous modifiers. Total up all the modifiers and write in the result at the far left. If your character wears armor, note the armor check penalty at the far right.

5 Record your character's base speed. For most characters, this will be 10 meters. Carrying a lot of gear can reduce your character's speed, so you'll need to know the base number.

6 Fill in the Dexterity and miscellaneous modifiers for Initiative, then total them at the left. The most common miscellaneous modifier is the Improved Initiative feat, which grants a +4 bonus to Initiative.

7 Calculate your character's current Reputation score (from class and level, as well as past deeds) and fill that in.

8 Record your character's base attack bonus. This is the base for class and level—not the total after modifiers.

9 Decide whether your character is Force-Sensitive or not; if so, mark the box for Force-Sensitive under "Feats/Special Abilities." Write in the number of Force Points your character has. To the right, indicate how many dice your character gets when you spend a Force Point (1d6, 2d6, and so on). You can find this information in Chapter 9: The Force. If your character is Force-Sensitive, also indicate how many dice you get when your character calls on the dark side. You may never do it, but it's always good to know for those times when the temptation is there. . . .

10 Record your character's three saving throw bonuses. Start with the base number (calculated by class and level), fill in the ability and miscellaneous modifiers, and total them at the left.

11 Record the various bonuses that apply to melee attacks (generally, your character's Strength modifier) and ranged attacks (your character's Dexterity modifier), along with size and miscellaneous bonuses, and total those. Then, for each weapon your character carries, fill in the pertinent data, and total the attack bonus. You'll probably want to list your most commonly used weapon at the top, so you can find it easily.

12 In the Skills section, record your character's maximum ranks (for both class skills and cross-class skills) in the header bar, then fill in your character's skills. All the possible skills your character could use are listed on the sheet; you should check off those skills that are cross-class for your character in the Cross Class column. There are also some blank lines at the bottom of the list, just in case your Gamemaster okays new skills. Because characters can use so many skills untrained, it could be convenient to fill in the ability modifier and the skill modifier (that is, the total of all the modifiers) for those skills, as well as for those for which you've bought ranks. If you've spent some of your skill points on additional languages, those go on the back of the character record sheet. Force skills are also on the back.

13 By now you should be ready to turn the character record sheet over and fill in all that "back of the sheet" stuff: the name of your campaign, how many experience points your character has, carried gear, credits, what languages he or she speaks, and maybe an illustration or general notes.

14 The really important stuff on the back of the sheet revolves around your character's Force skills, feats, and special abilities. For most of those, you can simply check the appropriate box, or write in the specifics. Some feats also grant miscellaneous modifiers to your skills. After that, you're ready to play!

NOTE: On the vehicle and starship record sheets, indicate weapon fire-arc coverage by marking the weapon number in the appropriate fire arc spaces on the diagram.

DROID ILLUSTRATION

[illegible]

"Impressive. Most impressive..."

No matter how unusual or powerful your **Star Wars** character is, these reference sheets are indispensable. Keep track of everything that makes your character unique on one easy-to-use sheet. This package also includes a vehicle record sheet, a starship record sheet, and a droid record sheet to help expand the details about your character's most prized possessions.

EACH
CHARACTER
RECORD
SHEET
FEATURES:

- ⊗ Clear, easy-to-find character details
- ⊗ Handy attack, defense, and saving throw information
- ⊗ A complete list of skills, feats, and Force powers
- ⊗ Room for character descriptions, unique items, and favorite quotes
- ⊗ An easy-to-photocopy design
